DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a food supplement comprising alpha lipoic acid and a source of amino acids, classified in class 514, subclass 440 and 554 for example.
- II. Claims 16-34, drawn to a method of increasing lean muscle mass and strength comprising administering a food supplement comprising alpha lipoic acid and a source of amino acids to the animal, classified in class 514, subclass 440 and 554 for example.
- III. Claims 35-43, drawn to a method for enhancing an athlete's muscle size comprising administering a food supplement comprising alpha lipoic acid and a glutamine derivative to the athlete, classified in class 514, subclass 440 and 554 for example.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the food supplement can be used in a method of improving sustained energy.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 1617

inventions have different functions. Group II is drawn to a method of increasing lean muscle mass and strength, whereas Group III is drawn to a method for enhancing an athlete's muscle size.

During a telephone conversation with Siu K. Lo on June 27, 2001 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-15. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16-43 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Paul et al. (US 5,292,538).

Art Unit: 1617

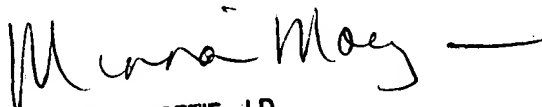

Paul et al. (US 5,292,538) discloses a nutritional composition comprising glucose polymers, lactalbumin (whey protein), amino acid ligands (e.g. zinc arginate), potassium, phosphorus, alpha-ketoglutarate (within the claimed range), lipoic acid (within the claimed range), vitamin C and Inositol, see claims and table columns 10-12, see also col. 4 lines 53-66.
